# FLO FAB

## History

**F**LO FAB was established in 1981 by **Denis Gauvreau**, who now has thirty-five years experience in this field. The main purpose of the company was to serve as a distributor of several different pump and HVAC accessories manufacturers. However, FLO FAB gradually dissociated itself from these manufacturers in order to offer its own line of products to the plumbing and heating contractor.

The FLO FAB product line, created and developed by Denis Gauvreau and constantly being perfected by Marc Gauvreau, Michelle Gauvreau as well as by a team of professional engineers and designers, is a combination of existing concepts from several renown products, and the innovative ideas of a new generation.

Through the years, FLO FAB has acquired several companies including three service centers: **MÉNARD**, **LÉONARDELECTRIQUE** and **PMA**. However, **AQUA PROFAB**, another company purchased in 1999 by FLO FAB, retained its original identity since the documents allowing it to manufacture pressure vessels under the ASME code, had already been registered under this name. Furthermore, in march 2001, FLO FAB purchased equipment, fabrication designs and patterns from **IDEALCO**, a manufacturer of shell and tube type heat exchangers that no longer wanted this item as part of their product line.

Regardless of these subdivisions, the service, repairs, sales, engineering, design, production, quality control, accounting and administration departments of all the above companies share the same location. This has allowed FLO FAB to form a competent and experienced staff of professionals with varied and specialized abilities which has proven favorable to an interesting exchange of ideas for conceiving new products.

Therefore, FLO FAB has grown quite rapidly and now consists of a wide range of products available directly from the manufacturer. This allows the plumbing and heating contractor to profit from savings without compromising the quality of the products he offers his clients.

# Our products

## PUMPS

- Vertical in-line
- Horizontal base-mounted
- Double suction
- Multi-stage
- Submersible
- Prefabricated systems
- Glycol fill systems
- Fuel oil systems

## ACCESSORIES

- Ball, Butterfly and Check valves
- Gauges and Thermometers
- Flexible connectors, Strainers, Air Vent
- Balancing valves, manual & automatic
- Multi-function valves and Suction diffusers

## SERVICES

- On-site service
- Repair shop
- Field or shop estimates
- On site delivery
- Parts counter

## TANKS

- Diaphragm expansion
- Bladder expansion
- Hydropneumatic bladder
- Hydropneumatic diaphragm
- Blow-down
- Hot water storage
- Plain steel
- Air separator
- As per ASME code

## HEAT EXCHANGERS

- Shell and tube
- Plate and frame
- Repair
- As per ASME code
